Intestinal Stem Cells · A1 Rescue vs WT
regulation of plasma lipoprotein particle levels
defense response to Gram−positive bacterium
protein−lipid complex organization
plasma lipoprotein particle organization
protein−containing complex remodeling
plasma lipoprotein particle remodeling
protein−lipid complex remodeling
high−density lipoprotein particle remodeling
up_in_A1_Rescue
vasculature development
blood vessel development
monocarboxylic acid metabolic process
MAPK cascade
carbohydrate metabolic process
regulation of cell adhesion
monoatomic ion transmembrane transport
small molecule biosynthetic process
