Paneth Cells · KO vs WT
regulation of cell migration
tube morphogenesis
monoatomic ion transport
vasculature development
animal organ morphogenesis
cell−cell adhesion
cell junction organization
positive regulation of cell population proliferation
up_in_KO
generation of precursor metabolites and energy
monocarboxylic acid metabolic process
small molecule biosynthetic process
energy derivation by oxidation of organic compounds
nucleobase−containing small molecule metabolic process
nucleoside phosphate metabolic process
cellular respiration
purine−containing compound metabolic process
