Absorptive enterocytes · KO vs WT
regulation of defense response
monocarboxylic acid metabolic process
cellular response to cytokine stimulus
lipid biosynthetic process
regulation of catalytic activity
positive regulation of cell population proliferation
actin filament−based process
cytokine production
up_in_KO
ribonucleoprotein complex biogenesis
cell division
ribosome biogenesis
gamete generation
chromosome organization
nucleobase−containing small molecule metabolic process
nucleoside phosphate metabolic process
nucleobase−containing compound catabolic process
