Dedifferentiating Paneth−like cells · A1 Het vs WT
mRNA processing
DNA repair
chromatin remodeling
RNA splicing
positive regulation of cell population proliferation
positive regulation of cell differentiation
supramolecular fiber organization
ribonucleoprotein complex biogenesis
up_in_A1_Het
monocarboxylic acid metabolic process
nucleobase−containing small molecule metabolic process
generation of precursor metabolites and energy
nucleoside phosphate metabolic process
small molecule biosynthetic process
energy derivation by oxidation of organic compounds
purine−containing compound metabolic process
cellular homeostasis
