Dedifferentiating Paneth−like cells · KO vs WT
supramolecular fiber organization
actin filament−based process
DNA repair
tube morphogenesis
actin cytoskeleton organization
muscle structure development
positive regulation of cell population proliferation
mRNA processing
up_in_KO
monocarboxylic acid metabolic process
small molecule biosynthetic process
lipid biosynthetic process
nucleobase−containing small molecule metabolic process
nucleoside phosphate metabolic process
fatty acid metabolic process
purine−containing compound metabolic process
monoatomic ion transport
