Enteroendocrine Cells · A1 Rescue vs KO
ribonucleoprotein complex biogenesis
ribosome biogenesis
nucleobase−containing small molecule metabolic process
nucleoside phosphate metabolic process
generation of precursor metabolites and energy
chromosome organization
energy derivation by oxidation of organic compounds
mitochondrion organization
up_in_A1_Rescue
synaptic signaling
trans−synaptic signaling
anterograde trans−synaptic signaling
chemical synaptic transmission
nervous system process
monoatomic cation transport
cell projection morphogenesis
plasma membrane bounded cell projection morphogenesis
