GSE109280_MEF · Sirt6 KO vs WT
skeletal system development
pattern specification process
ossification
cilium organization
taxis
chemotaxis
cilium assembly
leukocyte migration
up_in_Sirt6_KO
ribonucleoprotein complex biogenesis
small GTPase−mediated signal transduction
actin filament organization
ribosome biogenesis
regulation of translation
regulation of supramolecular fiber organization
cell−substrate adhesion
rRNA metabolic process
