Paneth Cells Progenitors · KO vs WT
positive regulation of cell population proliferation
mRNA processing
RNA splicing
DNA replication
angiogenesis
epithelial cell proliferation
regulation of epithelial cell proliferation
positive regulation of epithelial cell proliferation
up_in_KO
monocarboxylic acid metabolic process
chemical homeostasis
small molecule biosynthetic process
nucleobase−containing small molecule metabolic process
nucleoside phosphate metabolic process
monoatomic ion transport
generation of precursor metabolites and energy
response to nitrogen compound
