Goblet cells · A1 Rescue vs A1 Het
MAPK cascade
metal ion transport
response to bacterium
axon development
response to endoplasmic reticulum stress
glycoprotein metabolic process
glycoprotein biosynthetic process
connective tissue development
up_in_A1_Het
generation of precursor metabolites and energy
energy derivation by oxidation of organic compounds
nucleobase−containing small molecule metabolic process
monocarboxylic acid metabolic process
cellular respiration
mitochondrion organization
nucleoside phosphate metabolic process
purine−containing compound metabolic process
