Paneth Cells Progenitors · A1 Het vs WT
mRNA processing
chromatin remodeling
RNA splicing
positive regulation of cell population proliferation
RNA splicing, via transesterification reactions
mRNA splicing, via spliceosome
RNA splicing, via transesterification reactions with bulged adenosine as nucleophile
negative regulation of cell differentiation
up_in_A1_Het
nucleobase−containing small molecule metabolic process
generation of precursor metabolites and energy
nucleoside phosphate metabolic process
energy derivation by oxidation of organic compounds
purine−containing compound metabolic process
cellular respiration
monocarboxylic acid metabolic process
aerobic respiration
