GO_MF | Cybrd1+ ent | A1_Rescue_vs_KO | up in A
actin binding
structural molecule activity
calcium ion binding
ubiquitin−like protein ligase binding
ubiquitin protein ligase binding
GTP binding
actin filament binding
GTPase activity
lipid transporter activity
structural constituent of cytoskeleton
primary active transmembrane transporter activity
ATPase−coupled transmembrane transporter activity
calcium−dependent protein binding
active monoatomic ion transmembrane transporter activity
ATPase−coupled monoatomic cation transmembrane transporter activity
proton−transporting ATPase activity, rotational mechanism
clathrin binding
ATPase−coupled ion transmembrane transporter activity
ATPase activity, coupled to transmembrane movement of ions, rotational mechanism
lipase inhibitor activity
