GO_BP | Cybrd1+ ent | A1_Rescue_vs_KO | up in KO | n = 956
generation of precursor metabolites and energy
nucleobase−containing compound catabolic process
energy derivation by oxidation of organic compounds
purine−containing compound metabolic process
post−transcriptional regulation of gene expression
mRNA processing
RNA splicing
cellular respiration
mitochondrion organization
aerobic respiration
regulation of mRNA metabolic process
response to steroid hormone
hexose metabolic process
pyridine−containing compound metabolic process
nicotinamide nucleotide metabolic process
pyruvate metabolic process
purine ribonucleoside diphosphate metabolic process
purine nucleoside diphosphate metabolic process
purine nucleoside diphosphate catabolic process
regulation of stem cell population maintenance
