GO_BP | Cybrd1+ ent | KO_vs_WT | up in WT | n = 672
positive regulation of cellular component biogenesis
actin filament organization
epidermis development
actomyosin structure organization
cell−cell junction organization
epidermal cell differentiation
actin filament−based movement
regulation of cellular response to insulin stimulus
cell−cell junction assembly
receptor metabolic process
adherens junction organization
regulation of plasma membrane organization
extracellular vesicle biogenesis
extracellular exosome biogenesis
exosomal secretion
regulation of cardiac muscle cell action potential
regulation of exosomal secretion
positive regulation of exosomal secretion
insulin receptor recycling
astral microtubule organization
