GO_MF | Cybrd1+ ent | KO_vs_WT | up in WT | n = 6
calcium ion binding
actin binding
structural molecule activity
actin filament binding
GTPase activity
calmodulin binding
calcium−dependent protein binding
structural constituent of cytoskeleton
polypeptide conformation or assembly isomerase activity
scaffold protein binding
cytoskeletal motor activity
active monoatomic ion transmembrane transporter activity
ATPase−coupled monoatomic cation transmembrane transporter activity
proton−transporting ATPase activity, rotational mechanism
microfilament motor activity
ATPase−coupled ion transmembrane transporter activity
ATPase activity, coupled to transmembrane movement of ions, rotational mechanism
S100 protein binding
