GO_BP | EEC | A1_Het_vs_WT | up in WT | n = 912
small molecule biosynthetic process
generation of precursor metabolites and energy
purine−containing compound metabolic process
energy derivation by oxidation of organic compounds
cellular respiration
fatty acid metabolic process
small molecule catabolic process
aerobic respiration
response to oxygen levels
response to decreased oxygen levels
nucleoside triphosphate metabolic process
purine ribonucleoside triphosphate metabolic process
ATP metabolic process
pyruvate metabolic process
electron transport chain
respiratory electron transport chain
hexose catabolic process
glycolytic process through glucose−6−phosphate
glucose catabolic process to pyruvate
canonical glycolysis
