Reactome | EEC | A1_Re
Transport of small molecules
Metabolism of lipids
Hemostasis
Signaling by GPCR
GPCR downstream signalling
Platelet activation, signaling and aggregation
Neuronal System
Transmission across Chemical Synapses
Ion channel transport
Regulation of Insulin−like Growth Factor (IGF) transport and uptake by Insulin−like Growth Factor Binding Proteins (IGFBPs)
Muscle contraction
Post−translational protein phosphorylation
Neurotransmitter receptors and postsynaptic signal transmission
Integration of energy metabolism
Regulation of insulin secretion
Cardiac conduction
Golgi Associated Vesicle Biogenesis
Ion homeostasis
Cholesterol biosynthesis
CS/DS degradation
