Reactome | Fabp1+ ent | A1_Het_vs_WT | up in A1_Het | n = 889
Metabolism of lipids
Biological oxidations
Fatty acid metabolism
Phase II − Conjugation of compounds
Drug ADME
Phase I − Functionalization of compounds
Visual phototransduction
Sensory Perception
Plasma lipoprotein assembly, remodeling, and clearance
Glutathione conjugation
Metabolism of fat−soluble vitamins
Retinoid metabolism and transport
Mitochondrial Fatty Acid Beta−Oxidation
Arachidonate metabolism
Aspirin ADME
Plasma lipoprotein remodeling
Digestion and absorption
Chylomicron assembly
Biosynthesis of DHA−derived SPMs
Aflatoxin activation and detoxification
