GO_BP | Fabp1+ ent | A1_Het_vs_WT | up in WT | n = 656
chromosome organization
ribonucleoprotein complex biogenesis
chromosome segregation
positive regulation of cell cycle
nuclear chromosome segregation
nucleocytoplasmic transport
regulation of chromosome organization
mitotic nuclear division
response to oxygen levels
response to decreased oxygen levels
response to hypoxia
protein−RNA complex organization
protein−RNA complex assembly
positive regulation of cell cycle process
sister chromatid segregation
mitotic sister chromatid segregation
RNA localization
translational initiation
regulation of mitotic nuclear division
regulation of mitotic sister chromatid separation
