GO_BP | Fabp1+ ent | A1_Rescue_vs_A1_Het | up in A1_Rescue | n = 482
chromosome segregation
mitochondrial gene expression
cellular respiration
mitochondrial translation
regulation of chromosome organization
aerobic respiration
oxidative phosphorylation
cellular response to oxygen levels
electron transport chain
cellular response to decreased oxygen levels
respiratory electron transport chain
cellular response to hypoxia
negative regulation of chromosome organization
metaphase/anaphase transition of mitotic cell cycle
metaphase/anaphase transition of cell cycle
regulation of mitotic metaphase/anaphase transition
regulation of mitotic sister chromatid separation
spliceosomal snRNP assembly
regulation of mitochondrial gene expression
regulation of mitochondrial translation
