Cell Cycle, Mitotic
Processing of Capped Intron−Containing Pre−mRNA
M Phase
Translation
Mitotic Metaphase and Anaphase
Mitotic Anaphase
mRNA Splicing
mRNA Splicing − Major Pathway
Separation of Sister Chromatids
Resolution of Sister Chromatid Cohesion
mRNA Polyadenylation
Mitochondrial translation
Mitochondrial ribosome−associated quality control
Mitotic Spindle Checkpoint
Mitochondrial translation termination
Mitochondrial translation elongation
mRNA Splicing − Minor Pathway
APC/C:Cdc20 mediated degradation of mitotic proteins
snRNP Assembly
Metabolism of non−coding RNA
