GO_BP | Fabp1+ ent | A1_Rescue_vs_KO | up in A1_Rescue | n = 982
ribonucleoprotein complex biogenesis
chromosome organization
chromosome segregation
ribosome biogenesis
nuclear chromosome segregation
regulation of chromosome organization
mitotic nuclear division
rRNA metabolic process
sister chromatid segregation
rRNA processing
mitochondrial gene expression
oxidative phosphorylation
mitochondrial translation
respiratory electron transport chain
electron transport chain
metaphase/anaphase transition of mitotic cell cycle
metaphase/anaphase transition of cell cycle
regulation of chromosome separation
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
