GO_MF | Fabp1+ ent | A1_Rescue_vs_KO | up in A1_Rescue
ATP−dependent activity
catalytic activity, acting on RNA
structural molecule activity
isomerase activity
ATP hydrolysis activity
ribonucleoprotein complex binding
structural constituent of ribosome
catalytic activity, acting on a tRNA
ribosome binding
transferase activity, transferring alkyl or aryl (other than methyl) groups
antioxidant activity
snoRNA binding
glutathione transferase activity
oligopeptide binding
glutathione binding
tRNA−specific ribonuclease activity
DNA binding, bending
ribonuclease P activity
U1 snRNP binding
