GO_BP | Fabp1+ ent | A1_Rescue_vs_KO | up in KO | n = 872
blood vessel morphogenesis
response to bacterium
cellular response to lipid
positive regulation of apoptotic process
positive regulation of response to external stimulus
leukocyte differentiation
heart development
angiogenesis
myeloid cell differentiation
circulatory system process
epithelial cell proliferation
response to molecule of bacterial origin
response to oxygen levels
ossification
response to steroid hormone
response to decreased oxygen levels
response to hypoxia
response to lipopolysaccharide
response to ketone
positive regulation of inflammatory response
