GO_BP | Fabp1+ ent | A1_Rescue_vs_WT | up
negative regulation of cell differentiation
sensory organ development
blood vessel morphogenesis
mononuclear cell differentiation
lymphocyte differentiation
response to decreased oxygen levels
regulation of Wnt signaling pathway
T cell differentiation
heart morphogenesis
cellular response to starvation
epidermal cell differentiation
regulation of nucleocytoplasmic transport
positive regulation of intracellular transport
regulation of stem cell population maintenance
positive regulation of nucleocytoplasmic transport
viral gene expression
positive regulation of epithelial cell differentiation
viral translation
regulation of nuclear−transcribed mRNA catabolic process, deadenylation−dependent decay
IRES−dependent viral translational initiation
