GO_MF | Fabp1+ ent | KO_vs_WT | up in WT | n = 1009
ATP−dependent activity
catalytic activity, acting on RNA
mRNA binding
ATP hydrolysis activity
ribonucleoprotein complex binding
macromolecular conformation isomerase activity
histone modifying activity
histone binding
catalytic activity, acting on a tRNA
nucleic acid conformation isomerase activity
mRNA 3'−UTR binding
translation factor activity
single−stranded RNA binding
translation initiation factor activity
signal sequence binding
snoRNA binding
nucleocytoplasmic carrier activity
nuclear localization sequence binding
RNA polymerase II general transcription initiation factor binding
nuclear import signal receptor activity
