Reactome | Global | A1_Rescue_vs_A1_Het | up in A1_Rescue | n = 1830
Metabolism of lipids
Transport of small molecules
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Biological oxidations
SLC−mediated transmembrane transport
Fatty acid metabolism
Complex I biogenesis
Phase II − Conjugation of compounds
Drug ADME
Phase I − Functionalization of compounds
Glutathione conjugation
Cytoprotection by HMOX1
Cytochrome P450 − arranged by substrate type
Complex IV assembly
Aflatoxin activation and detoxification
Recycling of bile acids and salts
Heme degradation
Digestion and absorption
Atorvastatin ADME
