GO_BP | Global | A1_Rescue_vs_KO | up in A1_Rescue | n = 2099
fatty acid metabolic process
lipid transport
cellular respiration
aerobic respiration
oxidative phosphorylation
respiratory electron transport chain
electron transport chain
unsaturated fatty acid metabolic process
long−chain fatty acid metabolic process
icosanoid metabolic process
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
xenobiotic metabolic process
glutathione metabolic process
aerobic electron transport chain
proton motive force−driven mitochondrial ATP synthesis
proton motive force−driven ATP synthesis
protein−lipid complex organization
plasma lipoprotein particle organization
xenobiotic catabolic process
