KEGG | Global | A1_Rescue_vs_KO | up in A1_Rescue | n = 2099
Amyotrophic lateral sclerosis
Huntington disease
Parkinson disease
Prion disease
Thermogenesis
Chemical carcinogenesis − reactive oxygen species
Oxidative phosphorylation
Diabetic cardiomyopathy
Non−alcoholic fatty liver disease
Chemical carcinogenesis − DNA adducts
Ribosome
Drug metabolism − other enzymes
Steroid hormone biosynthesis
PPAR signaling pathway
Retinol metabolism
Drug metabolism − cytochrome P450
Metabolism of xenobiotics by cytochrome P450
Glutathione metabolism
Linoleic acid metabolism
Fat digestion and absorption
