Reactome | Global | A1_Rescue_vs_KO | up in A1_Rescue | n = 2099
Transport of small molecules
Aerobic respiration and respiratory electron transport
Translation
Respiratory electron transport
Biological oxidations
Drug ADME
Mitochondrial translation
Mitochondrial translation termination
Mitochondrial ribosome−associated quality control
Phase II − Conjugation of compounds
Mitochondrial translation elongation
Complex I biogenesis
Plasma lipoprotein assembly, remodeling, and clearance
Glutathione conjugation
Aspirin ADME
Plasma lipoprotein remodeling
ROS and RNS production in phagocytes
Triglyceride metabolism
Atorvastatin ADME
Aflatoxin activation and detoxification
