GO_BP | Global | A1_Rescue_vs_WT | up in WT | n = 1937
blood vessel morphogenesis
negative regulation of cell differentiation
cellular response to growth factor stimulus
positive regulation of locomotion
positive regulation of cell motility
positive regulation of cell migration
G protein−coupled receptor signaling pathway
angiogenesis
positive regulation of cell adhesion
ossification
renal system development
kidney development
cell surface receptor protein serine/threonine kinase signaling pathway
transforming growth factor beta receptor superfamily signaling pathway
regulation of cellular response to growth factor stimulus
muscle organ development
regulation of vasculature development
regulation of angiogenesis
osteoblast differentiation
cartilage development
