GO_MF | Global | A1_Rescue_vs_WT | up in WT | n = 1937
signaling receptor activity
molecular transducer activity
calcium ion binding
signaling receptor regulator activity
transmembrane signaling receptor activity
signaling receptor activator activity
receptor ligand activity
metal ion transmembrane transporter activity
passive transmembrane transporter activity
channel activity
cell adhesion molecule binding
monoatomic cation channel activity
glycosaminoglycan binding
G protein−coupled receptor activity
heparin binding
growth factor binding
potassium ion transmembrane transporter activity
extracellular matrix structural constituent
ligand−gated monoatomic cation channel activity
fibronectin binding
