GO_MF | Global | KO_vs_WT | up in KO | n = 2357
molecular function inhibitor activity
signaling receptor activity
molecular transducer activity
signaling receptor regulator activity
calcium ion binding
signaling receptor activator activity
receptor ligand activity
transmembrane signaling receptor activity
cell adhesion molecule binding
glycosaminoglycan binding
integrin binding
cytokine activity
extracellular matrix structural constituent
cell adhesion mediator activity
chemokine receptor binding
hydrolase activity, hydrolyzing N−glycosyl compounds
chemokine activity
neurotransmitter receptor regulator activity
acetylcholine receptor regulator activity
BH domain binding
