Reactome | Global | KO_vs_WT | up in KO | n = 2357
Signaling by GPCR
GPCR downstream signalling
Extracellular matrix organization
GPCR ligand binding
G alpha (i) signalling events
Peptide ligand−binding receptors
Antimicrobial peptides
Integrin cell surface interactions
Telomere C−strand (Lagging Strand) Synthesis
Activation of the pre−replicative complex
Defensins
Chemokine receptors bind chemokines
Mismatch repair (MMR) directed by MSH2:MSH6 (MutSalpha)
Alpha−defensins
ECM proteoglycans
