GO_BP | Global | KO_vs_WT | up in WT | n = 2249
regulation of hormone levels
generation of precursor metabolites and energy
fatty acid metabolic process
monoatomic ion homeostasis
monoatomic cation homeostasis
lipid localization
organic anion transport
lipid transport
inorganic ion homeostasis
forebrain development
organic acid transport
carboxylic acid transport
steroid metabolic process
carboxylic acid biosynthetic process
telencephalon development
hormone metabolic process
lipid homeostasis
carboxylic acid transmembrane transport
amino acid transmembrane transport
L−alpha−amino acid transmembrane transport
