mRNA processing
RNA splicing
ribonucleoprotein complex biogenesis
RNA splicing, via transesterification reactions
mRNA splicing, via spliceosome
RNA splicing, via transesterification reactions with bulged adenosine as nucleophile
protein folding
humoral immune response
regulation of wound healing
defense response to Gram−positive bacterium
regulation of membrane permeability
antimicrobial humoral response
antimicrobial humoral immune response mediated by antimicrobial peptide
defense response to Gram−negative bacterium
positive regulation of wound healing
positive regulation of membrane permeability
antibacterial humoral response
mitotic DNA replication
disruption of plasma membrane integrity in another organism
disruption of cellular anatomical structure in another organism
