GO_BP | Goblet | A1_Rescue_vs_WT | up in WT | n = 545
purine−containing compound metabolic process
generation of precursor metabolites and energy
response to nutrient levels
energy derivation by oxidation of organic compounds
cellular respiration
response to oxygen levels
aerobic respiration
response to hypoxia
response to decreased oxygen levels
pyridine−containing compound metabolic process
nicotinamide nucleotide metabolic process
carbohydrate catabolic process
pyruvate metabolic process
purine ribonucleoside diphosphate metabolic process
purine nucleoside diphosphate metabolic process
ADP metabolic process
pyridine nucleotide catabolic process
purine nucleoside diphosphate catabolic process
glycolytic process
ADP catabolic process
