Reactome | Imm ent | A1_Het_vs_WT | up in WT | n = 1658
Metabolism of lipids
Transport of small molecules
Biological oxidations
Fatty acid metabolism
SLC−mediated transmembrane transport
Phase I − Functionalization of compounds
Phase II − Conjugation of compounds
Drug ADME
Cytochrome P450 − arranged by substrate type
Glutathione conjugation
Aspirin ADME
Metabolism of porphyrins
Digestion and absorption
Biosynthesis of specialized proresolving mediators (SPMs)
Biosynthesis of DHA−derived SPMs
Xenobiotics
Triglyceride metabolism
Aflatoxin activation and detoxification
Miscellaneous substrates
Digestion
