GO_BP | Imm ent | A1_Rescue_vs_A1_Het | up in A1_Rescue | n = 150
generation of precursor metabolites and energy
fatty acid metabolic process
energy derivation by oxidation of organic compounds
cellular respiration
small molecule catabolic process
aerobic respiration
modified amino acid metabolic process
oxidative phosphorylation
electron transport chain
respiratory electron transport chain
olefinic compound metabolic process
long−chain fatty acid metabolic process
xenobiotic metabolic process
glutathione metabolic process
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
aerobic electron transport chain
proton motive force−driven mitochondrial ATP synthesis
proton motive force−driven ATP synthesis
xenobiotic catabolic process
