Reactome | Imm ent | A1_Rescue_vs_A1_Het | up in A1_Rescue | n =
Metabolism of lipids
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Biological oxidations
Mitochondrial translation
Mitochondrial ribosome−associated quality control
Phase II − Conjugation of compounds
Mitochondrial translation termination
Mitochondrial translation elongation
Drug ADME
Complex I biogenesis
Regulation of mitotic cell cycle
APC/C−mediated degradation of cell cycle proteins
Glutathione conjugation
Paracetamol ADME
Biosynthesis of specialized proresolving mediators (SPMs)
Biosynthesis of DHA−derived SPMs
Aflatoxin activation and detoxification
Digestion and absorption
Chylomicron assembly
