lipid transporter activity
iron ion binding
proton transmembrane transporter activity
primary active transmembrane transporter activity
structural constituent of ribosome
tetrapyrrole binding
heme binding
monooxygenase activity
lipid transfer activity
active monoatomic ion transmembrane transporter activity
, acting on paired donors, with incorporation or reduction of molecular oxygen, reduced flavin or flavoprotein as one donor, and incorporation of one atom of oxygen
glutathione transferase activity
proton−transporting ATPase activity, rotational mechanism
ATPase−coupled ion transmembrane transporter activity
ATPase activity, coupled to transmembrane movement of ions, rotational mechanism
steroid hydroxylase activity
retinoic acid 4−hydroxylase activity
oxidoreductase activity, acting on CH or CH2 groups
arachidonate monooxygenase activity
arachidonate epoxygenase activity
0.
