Reactome | Imm ent | A1_Resc
Cellular responses to stimuli
Cellular responses to stress
Aerobic respiration and respiratory electron transport
Translation
Respiratory electron transport
Asparagine N−linked glycosylation
Biological oxidations
Cellular response to chemical stress
Complex I biogenesis
Mitochondrial translation
Mitochondrial translation elongation
Mitochondrial ribosome−associated quality control
Phase II − Conjugation of compounds
Ribosome−associated quality control
Biosynthesis of the N−glycan precursor (dolichol lipid−linked oligosaccharide, LLO) and transfer to a nascent protein
Ribosome Quality Control (RQC) complex extracts and degrades nascent peptide
Transferrin endocytosis and recycling
ROS and RNS production in phagocytes
Insulin receptor recycling
Chylomicron assembly
