GO_MF | Imm ent | A1_Rescue_vs_KO | up in KO | n = 1348
signaling receptor activity
molecular transducer activity
mRNA binding
kinase regulator activity
cell adhesion molecule binding
ubiquitin−like ligase−substrate adaptor activity
glycosaminoglycan binding
integrin binding
growth factor binding
protein tyrosine kinase activity
heparin binding
transcription regulator inhibitor activity
potassium channel regulator activity
proteoglycan binding
ligand−gated monoatomic anion channel activity
intracellularly calcium−gated chloride channel activity
intracellularly calcium−gated channel activity
