GO_BP | Imm ent | KO_vs_WT | up in WT | n = 941
small molecule biosynthetic process
generation of precursor metabolites and energy
fatty acid metabolic process
response to nutrient levels
energy derivation by oxidation of organic compounds
cellular respiration
intracellular monoatomic ion homeostasis
intracellular monoatomic cation homeostasis
aerobic respiration
organic acid biosynthetic process
carboxylic acid biosynthetic process
alcohol metabolic process
response to starvation
electron transport chain
respiratory electron transport chain
oxidative phosphorylation
isoprenoid metabolic process
terpenoid metabolic process
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
