ATP−dependent activity

active transmembrane transporter activity

ATP hydrolysis activity

acyltransferase activity, transferring groups other than amino−acyl groups

oxidoreductase activity, acting on paired donors, with incorporation or reduction of molecular oxygen

iron ion binding

primary active transmembrane transporter activity

ATPase−coupled transmembrane transporter activity

monooxygenase activity

oxidoreductase activity, acting on the aldehyde or oxo group of donors, NAD or NADP as acceptor

oxidoreductase activity, acting on the aldehyde or oxo group of donors

O−acyltransferase activity

ABC−type transporter activity

, acting on paired donors, with incorporation or reduction of molecular oxygen, reduced flavin or flavoprotein as one donor, and incorporation of one atom of oxygen

aldehyde dehydrogenase [NAD(P)+] activity

aldehyde dehydrogenase (NAD+) activity

retinoic acid 4−hydroxylase activity

oxidoreductase activity, acting on paired donors, with oxidation of a pair of donors resulting in the reduction of molecular oxygen to two molecules of water
