KEGG | Imm ent | KO_vs_WT | up in WT | n = 941
Parkinson disease
Lysosome biogenesis
Prion disease
Chemical carcinogenesis − reactive oxygen species
Thermogenesis
Non−alcoholic fatty liver disease
Diabetic cardiomyopathy
Biosynthesis of cofactors
Oxidative phosphorylation
Fatty acid metabolism
Chemical carcinogenesis − DNA adducts
Retinol metabolism
N−Glycan biosynthesis
Various types of N−glycan biosynthesis
Fat digestion and absorption
ABC transporters
Glycine, serine and threonine metabolism
Amino sugar and nucleotide sugar metabolism
Tryptophan metabolism
Ascorbate and aldarate metabolism
