Reactome | Paneth | A1_Rescue_vs_KO | up in A1_Rescue | n = 514
Metabolism of lipids
Transport of small molecules
Cellular responses to stimuli
Neutrophil degranulation
Cellular responses to stress
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Metabolism of steroids
Ion channel transport
Complex I biogenesis
Iron uptake and transport
Cholesterol biosynthesis
Signaling by Insulin receptor
Insulin receptor recycling
Transferrin endocytosis and recycling
Complex IV assembly
Cellular response to starvation
Amino acids regulate mTORC1
ROS and RNS production in phagocytes
Lanosterol biosynthesis
