GO_BP | Pre−Paneth | A1_Het_vs_WT | up in WT | n = 999
small molecule biosynthetic process
response to nutrient levels
generation of precursor metabolites and energy
energy derivation by oxidation of organic compounds
fatty acid metabolic process
cellular respiration
response to xenobiotic stimulus
aerobic respiration
organic acid biosynthetic process
carboxylic acid biosynthetic process
amino acid metabolic process
ATP metabolic process
cellular response to xenobiotic stimulus
oxidative phosphorylation
digestion
digestive system process
body fluid secretion
intestinal absorption
regulation of digestive system process
detoxification of inorganic compound
