GO_BP | Pre−Paneth | A1_Rescue_vs_A1_Het | up in A1_He
heart development
blood vessel morphogenesis
regulation of DNA metabolic process
DNA replication
positive regulation of DNA metabolic process
rhythmic process
heart morphogenesis
response to starvation
circadian rhythm
cellular response to starvation
stem cell differentiation
recombinational repair
double−strand break repair via homologous recombination
DNA biosynthetic process
protein−DNA complex assembly
regulation of double−strand break repair via homologous recombination
cardiac septum morphogenesis
cell cycle DNA replication
nuclear DNA replication
DNA synthesis involved in DNA replication
