GO_MF | Pre−Paneth | A1_Rescue_vs_A1_Het | up in A1_Rescue |
organic acid binding
carboxylic acid binding
structural constituent of ribosome
primary active transmembrane transporter activity
metal cluster binding
monocarboxylic acid binding
ATPase−coupled transmembrane transporter activity
iron−sulfur cluster binding
fatty acid binding
antioxidant activity
electron transfer activity
peroxidase activity
oxidoreductase activity, acting on peroxide as acceptor
glutathione transferase activity
2 iron, 2 sulfur cluster binding
quinone binding
glutathione peroxidase activity
oligopeptide binding
intramolecular oxidoreductase activity, transposing C=C bonds
glutathione binding
