Reactome | Pre−Paneth | A1_Rescue_vs_A1_Het | up in A1_Rescue | n =
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Translation
Biological oxidations
Mitochondrial translation
Mitochondrial ribosome−associated quality control
Complex I biogenesis
Mitochondrial translation termination
Mitochondrial translation elongation
Cellular response to chemical stress
TP53 Regulates Metabolic Genes
Phase I − Functionalization of compounds
Complex IV assembly
Phase II − Conjugation of compounds
Cytoprotection by HMOX1
Glutathione conjugation
Cytochrome P450 − arranged by substrate type
